

PATENT
09/845,464

Please amend the claims to read:

- 1 1. (currently amended) In a World Wide Web (Web) network
2 system including a plurality of computer controlled display
3 Web stations for receiving Web pages transmitted over the
4 Web, a system for directing users having different reading
5 skills through a reading of a Web page received at a Web
6 station comprising:
7 means for transmitting a Web page in a markup language
8 comprising control tags enabling the Web page to be read in
9 a plurality of selectable readable modes; and
10 at least one of said readable modes including a movable
11 indicator directing the user to read along the Web page in a
12 predetermined orthogonal progressive pattern; and
13 means at said receiving Web station for selectively
14 displaying said received Web page in said moving indicator
15 mode.
- 1 2. (original) The Web network system of claim 1 wherein said
2 indicator is an element highlighting a sequential block of
3 data.
- 1 3. (original) The Web network system of claim 2 wherein said
2 highlighted block of data is brighter than the other data on
3 the Web page.
- 1 4. (original) The Web network system of claim 2 wherein said
2 highlighted block of data has a color different from the
3 color of the other data on the Web page.

PATENT
09/845,464

1 5. (cancelled)

1 6. (original) The Web network system of claim 2 further
2 including means for selectively varying the dimensions of
3 said indicator element.

1 7. (original) The Web network system of claim 2 further
2 including means for selectively varying the speed at which
3 the indicator element progressively moves along said page.

1 8. (original) The Web network system of claim 2 further
2 including means for selectively increasing the size of the
3 data in said block relative to the remainder of data on said
4 Web page.

1 9. (original) The Web network system of claim 4 further
2 including a plurality of said movable indicators wherein
3 each of the highlighted blocks of data within each of said
4 plurality of indicators has a color respectively different
5 from the blocks of data within the other indicators.

1 10. (currently amended) The Web network system of claim 5
2 wherein said means at said receiving Web station for reading
3 said Web page includes a Web browser.

1 11. (original) The Web network system of claim 10 wherein
2 said Web page is transmitted in Hypertext Markup Language.

1 12. (original) The Web network system of claim 11 wherein:
2 said Web page includes text; and
3 said highlighted block of text is a grammatical unit.

PATENT
09/845,464

1 13. (currently amended) In a Web network system including a
2 plurality of computer controlled display Web stations for
3 receiving Web pages transmitted over the Web, a method for
4 directing users having different reading skills through a
5 reading of a Web page received at a Web station comprising:
6 transmitting a Web page in a markup language comprising
7 control tags enabling the Web page to be read in a plurality
8 of selectable readable modes; and
9 in at least one of said readable modes, enabling a
10 movable indicator directing the user to read along the Web
11 page in a predetermined orthogonal progressive pattern; and
12 selectively displaying said received Web page in said
13 moving indicator mode at said receiving Web station.

1 14. (original) The method of claim 13 wherein said indicator
2 is an element highlighting a sequential block of data.

1 15. (original) The method of claim 14 wherein said
2 highlighted block of data is made brighter than the other
3 data on the Web page.

1 15. (original) The method of claim 14 wherein said
2 highlighted block of data is given a color different from
3 the color of the other data on the Web page.

1 17. (cancelled)

1 18. (original) The method of claim 14 further including the
2 step of selectively varying the dimensions of said indicator
3 element.

PATENT
09/845,464

1 19. (original) The method of claim 14 further including the
2 step of selectively varying the speed at which the indicator
3 element progressively moves along said page.

1 20. (original) The method of claim 14 further including the
2 step of selectively increasing the size of the data in said
3 block relative to the remainder of data on said Web page.

1 21. (original) The method of claim 16 including the steps
2 of:
3 enabling a plurality of said movable indicators; and
4 giving each of the highlighted blocks of data within
5 each of said plurality of indicators a color respectively
6 different from the blocks of data within the other
7 indicators.

1 22. (currently amended) The method of claim ~~17~~ 13 further
2 including a Web browser process at said receiving Web
3 station for reading said Web page.

1 23. The method of claim 22 wherein said Web page is
2 transmitted in Hypertext Markup Language.

1 24. The method of claim 23 wherein:
2 said Web page includes text; and
3 said highlighted block of text is a grammatical unit.

PATENT
09/845,464

1 25. (currently amended) A computer program having code
2 recorded on a computer readable medium for directing users
3 having different reading skills through a reading of a Web
4 page received at a Web computer controlled display station
5 comprising:

6 means for transmitting a Web page in a markup language
7 comprising control tags enabling the Web page to be read in
8 a plurality of selectable readable modes; and

9 at least one of said readable modes including a movable
10 indicator directing the user to read along the Web page in a
11 predetermined orthogonal progressive pattern; and

12 means at said receiving Web station for selectively
13 displaying said received Web page in said moving indicator
14 mode.

1 26. (original) The computer program of claim 25 wherein said
2 indicator is an element highlighting a sequential block of
3 data.

1 27. (original) The computer program of claim 26 wherein said
2 highlighted block of data is brighter than the other data on
3 the Web page.

1 28. (original) The computer program of claim 26 wherein said
2 highlighted block of data has a color different from the
3 color of the other data on the Web page.

1 29. (cancelled)

1 30. (original) The computer program of claim 26 further
2 including means for selectively varying the dimensions of
3 said indicator element.

AUS920010330US1

PATENT
09/845,464

1 31. (original) The computer program of claim 26 further
2 including means for selectively varying the speed at which
3 the indicator element progressively moves along said page.

1 32. (original) The computer program of claim 26 further
2 including means for selectively increasing the size of the
3 data in said block relative to the remainder of data on said
4 web page.

1 33. (original) The computer program of claim 28 further
2 including a plurality of said movable indicators wherein
3 each of the highlighted blocks of data within each of said
4 plurality of indicators has a color respectively different
5 from the blocks of data within the other indicators.

1 34. (currently amended) The computer program of claim ~~29~~ 25
2 wherein said means at said receiving Web station for reading
3 said Web page include a Web browser program.

1 35. (original) The computer program of claim 34 wherein said
2 web page is transmitted in Hypertext Markup Language.

1 36. (original) The computer program of claim 35 wherein:
2 said web page includes text; and
3 said highlighted block of text is a grammatical unit.
